To CURE A Coun.-Hundreds of remeties are daily prescribed for a cold, many of very opposite tendences; and ha it is the nature of the complaint to disappear of us own accord in a very few days, every femedy in succession has come in for a share of praise. They may be all summed up, however, in water-grael or spare living, moderate warinth and perspiration, and one or two gentle purgatives. Some not satisfied with this method of starving a cold, have maintained that quite an opposite plan of diet and treatment is the proper one. A fit of intexication has, no doubt, sometimes cured a disagreeable cold, as well as pluiging into a cold bath, or a stew and swent in a warm crowded room; but these are uncertain and doubtful expedients, and their consequences may in nine cases out of ter, be hartful; and unquestionably, the most-rational plan is the starving system — For allaying the ticking cough, an infusion of linseed may be freely taken, or an intusion of quince seeds, or a solution of gum arabic in water; these are preferable to the sweet syrups in general use, as the lormer may be taken in large quantities, and repeatedly, without loading the stomach.

A hard case.-A strong argument for the Anti-Capital Punishment men is seen in the fact that a lawyer in England, transported three years ago for forgery, has I cenfound to be maccent, and sent for. When convicted, he had a practice worth £15,500

Shocking.—They are murdering their children in England, in order to get the funeral fees from the burial club. The childrea's lives are first insured for a few shilllings, and then they are Burked! This seems too horrible for belief but the English papers give it as a fact.

Exart Crime-In Dedicam, two brothers named Coakly. Incarged 10, and the other 15 years, were sentenced to the State Prison for five and three years respectively, for burglary. They are said to be the youngest persons ever so tended to the Massachusetts State Prison.

IL3"At Cincinnati, the astonishing nomher of 5000 families were rendered houseless by the recent floods. It is proposed to ercut a monument in some conspicous place, showing the greatest elevation the river attained.

## THE DAILY NEWS.

## Newport:

SATTRDAY, JANUARY 29, 1848.

BY O. F. JACKSON, 97-THAMES ST

HJ-Advertisers will please bear in mind that the circulation of the DAILY NEWS is more than DOUBLE that of the Daily Herald, and greater than the combined cir-culation of the Dally and Weekly Herald. As one proof of this fact, the list of Letters remaining in the Post-Office is advertised in the NEWS, as BY LAWREQUIRED.

Lare Insunance .- This is a subject that has auracted much attention in the world. during the last few years, and particularly in this country; we hardly take up a paper that does not contain some notice of its practical benefits, or on announcement of the death of some person who, by his prodence and foresight in insuring his life, as it is termed, has thus left his family in very comfortable circumstances. These Inscitutions have been in successful operation in England for more than a century; but it is only recently that their advantages have been sufficiently considered, and their benefits embraced, in our own country. In the mean time, the experience of institutions of the kind in the old world has been maturing, until it has become demanstrated, by actual results, that well conducted Life Insurance Companies not only afford perfect security to the insured, but also furnish a cafe and profitable investment to capitalists. After paying all losses and expenses, the profits have not only made a regular return of interest, but large accumulations of surplus were returned to the stockholders. Hence arose the plan of Mutual Insurance, by which the insured share among themselves the nett profits of the business; and so rapidly has this system grown into public favor, that at this time the greatest portion of all insuracces effected, is with Mutual Insurance Companies.

The Mutual Benefit L.fe Insurance Company, of Newark, New Jersey, at the expiration of two years from its commencement, paid all its losses and expenses, amounting to \$76.816, 03; they also declared a dividend of thirty fire per cent. on the first year's business, from the nett earned premions of the Company. We might go on at great length, and enumerate the " thousand and one" benefits to be derived from Life Insurance, but it seems altogeth er unnecessary. The whole sum and substance of the matter is just this :- a person pays a small som annually, or gives his note for a certain amount, with a part in eash, and then, when he dies, his family recieve the amount for which he was insured. Milton Hall, Esq., is Agent for the Mutual Benefit Life Insurance Company, in this town; and all persons, feeling interested in the subject, can obtain the necessary information and all particulars and details from him, as well as Polices of In-

(35 We accidently discovered yesterday, the Herald had altered its assertion in regard to its circulation. At first it claimed o have a vireulation "twice as large as any other daily paper in Newport; but it has come down just one half, and now says it has a circulation " as large as any other i daily paper in Newport." This is coming down considerable, to be sure, but then this is almost as far from the truth as the first assertion. Our offer to the Herald still remains open. We will give the publish r \$100 if he will prove that the circu'a tion of the Daily Herald is equal to that of, the Daily News.

Now, sic, as you regard truth, and the morals of community, prove your assertion. or else withdraw that paragraph from your paper. No honorable man could do,

But as to the poor devil of a private, who returns home to his family and friends, with wounds which render him incapable of exertion to support that have heretofore prevented the Newport Court of Magistrates. Read, accepted, and but the soldier's pittance, his pay, and possibly he may be entitled to his miserable 125 acres of land in some outlandish corner of the country, as his recompense. He recieves no potice, not even the thanks of his fellow citizens; his name has not been mentioned in the public despatches, and mentioned in the public despatches, and the pony" passing his office, as it frequen-consequently he must remain unknown by does, he lets drive a handfull of mude at of war. The ten regiment bill was then taand unhonored. Verily this seeking "reputation at the cannon's mouth" is a humbug.

Another very melancholy case of soicide occurred in the City prison on Monday,that of Dr. Wells, who was confined on the charge of throwing vitriol upon the dresses of those ladies who promenaded Broadway in the evening.

Dr. Wells is known to the scientific world as one of the first, (if not the first,) who discovered, and used chloroform as a subscitute for ether. His letters are published, giving his reasons for committing the rask act, in which he states the influence the inhaling of the chloroform had upon him, and ; which was the cause of his committing the deed which led to his arrest.

President making is now the most popular game or amusement in vogue in this city. Glorious Harry Clay's friends are the most numerous, and most enthusiastic, among the Whigs; while among their opponents it is difficult to say who is the favorite. Rough and Ready has many good and influential friends, but they cannot find him; he won't show his flag, and consequently the ultras of either party are altain of getting their fingers burned, if they meddle with him.

> Yours, &c. Cosmorolite.

During the last twenty years it has worked its way into extensive use, wholly upon its own merits, by commendation from individual to individual, not having been advertised for more than twelve years till within the past few months -- save occasignally in a journal of which the present proprietor is riditor. A faithful trial of a half dollar or dollar package is almost certain to secure use in every family where it is introduced, where medicine is needed. The undersigned has used it in his own family for more than fitteen years—has knowledge of its approved use in many others, (for periods varying from months to fifteen or sixteen years.) as their only medicine, and knows it to be valuable in most of the complaints incident to the human system.
